GitFlow

Responsive Design

REST APIs

Cypress

Jest

Material UI

WORK EXPERIENCE

TOPFOLIO

React, TypeScript, HTML5 & CSS3, Material UI, Node, Express, MongoDB, Mongoose

A full-stack web application, made for creative professionals who want to have a way to quickly showcase their work in an aesthetic way, but do not want to have to worry about building or designing the portfolio itself. This was a group project that I worked on with a group of five. I gained experience in project management, communication and working with GitFlow.

GOODS4GOOD

Angular, TypeScript, HTML5 & CSS3, Node, Express, MongoDB, NestJS, Cypress

A fully responsive, full-stack web application that helps people finding charitable causes and donate to them. I was brought on one week into development to add new features and testing. I also gained experience in reading and modifying a foreign codebase.

MY FITNESS TRACKER

React, JavaScript, HTML5 & CSS3, Tailwind CSS, Node, Express, PostgreSQL, Sequelize

A full-stack web application which I built from scratch by myself in just one week. The purpose of this app was to give users a way to easily keep track and view their progress on workouts that they do in the gym.

EDUCATION

Software Engineering Immersive Course	Graduated	Codeworks	2022
Mechanical Engineering with Mechatronics (BEng)	1st Class Honors	University of Hertfordshire	2018 – 2022
A-Levels – Mathematics, Physics, Chemistry	B, C, C	Cox Green Sixth Form	2016 – 2018
GCSEs	7 A's, 4 B's	Cox Green Secondary School	2011 – 2016
